PROFESSIONAL SUMMARY

Computer Science postgraduate with hands-on experience in Machine Learning, AWS Cloud Computing and data processing, plus a completed 3-month internship as a Project Associate Intern at Goat Robotics Pvt. Ltd., Coimbatore. Skilled in Python, ML workflows, Flask APIs, local LLM integration, and AWS services including EC2, S3, and IAM. Eager to contribute to practical engineering and technology projects.

EXPERIENCE

Project Associate Intern — Goat Robotics Pvt. Ltd., Coimbatore — 14 July 2026 – 31 October 2026 | 3-month internship

- Successfully completed a 3-month internship program and contributed to assigned tasks with dedication and sincerity.
- Demonstrated initiative, professionalism, and a positive attitude throughout the internship.

EDUCATION

Master of Computer Applications (MCA) — KGISL Institute of Information Management, Coimbatore (2023–2025)

B.Sc. Computer Science — KG Arts and Science College, Coimbatore (2020–2023)

TECHNICAL SKILLS

Programming: Python, JavaScript | **ML / Data:** Supervised Classification, Scikit-learn, XGBoost, Random Forest, SVM, Pandas, NumPy, Feature Engineering, Basic NLP

AWS: EC2, S3, IAM, SageMaker, Static Website Hosting | **Backend & Integration:** Flask, REST APIs, JSON-RPC / XML-RPC, PostgreSQL, Odoo ERP

AI / Frontend: Ollama (local LLMs), React, Vite, Tailwind CSS | **Tools:** Git, GitHub, Visual Studio Code, Excel

OS & Networking: Linux (Ubuntu/CentOS), TCP/IP and DNS Fundamentals

PROJECTS

Phishing Website Detection System: End-to-end ML system that extracts URL features and classifies sites as legitimate or phishing using XGBoost, Random Forest and SVM; served via a Flask REST API, web interface and Chrome extension. Achieved 99.57% accuracy on the project's test dataset.

ML Model Deployment on AWS: Built a binary classification model with scikit-learn and deployed it on EC2 as a REST-accessible service; used S3 for model artefact storage and IAM instance roles.

Odoo Local LLM Assistant: Local assistant (Ollama, Llama 3.1) that turns natural-language questions into validated read-only PostgreSQL queries or Odoo XML-RPC calls and summarises results, keeping enterprise data fully local.

Project Monitor & EVM Dashboard: Flask-based dashboard that processes Excel project timelines and computes Earned Value Management metrics, with Gantt views, milestone tracking, planned-vs-actual progress and a multi-project master dashboard.

Cloud-Based Data Processing Pipeline: Designed a Python ETL pipeline for data ingestion, cleaning and preprocessing, with outputs stored in S3 and scheduled execution, reducing repetitive manual work.

Odoo API Automation Task: Defensive Python module for automating Odoo ERP via REST/JSON-RPC, with error handling and fallbacks for local and live environments.

NEXUS AI – Autonomous AI & Data Platform: Responsive frontend for an AI deployment platform built with React, Vite and Tailwind CSS using a component-based architecture.

Static Website Hosting on AWS S3: Configured static hosting with custom error pages and bucket access policies.

IAM-Based Access Control: Configured IAM users, groups, roles, and least-privilege policies for EC2 and S3.

NLP Text Classification: Built a text classification pipeline using tokenisation, stop-word removal, TF-IDF, model training, and precision/recall/F1 evaluation.

CORE COMPETENCIES & LANGUAGES

Problem Solving · Analytical Thinking · Teamwork & Collaboration · Communication · Adaptability · Time Management

Languages: Tamil (Native) · English (Professional) · Telugu (Conversational)
