

SATHYANAND N S

Machine Learning & Cloud Computing Engineer

Coimbatore, Tamil Nadu • +91 99525 26732 • sathyanandns0342@gmail.com

ABOUT ME

I recently completed my MCA with a strong focus on Machine Learning and AWS Cloud Computing, and I genuinely enjoy working at the intersection of data and infrastructure. Over the past couple of years, I've built and deployed ML models, set up cloud based data pipelines, and learned firsthand how to manage AWS resources securely. I'm someone who takes ownership of problems. I don't just write code that runs, I think about whether it's scalable, maintainable, and actually solves the right problem.

EDUCATION

Master of Computer Applications (MCA) | *KGISL Institute of Information Management, Coimbatore* | 2023 – 2025

Bachelor of Science – Computer Science | *KG Arts and Science College, Coimbatore* | 2020 – 2023

TECHNICAL SKILLS

Programming: Python

Machine Learning: Supervised Classification, Data Preprocessing, Feature Engineering, Basic NLP

Cloud (AWS): EC2, S3, Static Website Hosting

Tools & Platforms: Git, GitHub, Visual Studio Code

OS & Networking: Linux (Ubuntu/CentOS), TCP/IP & DNS Fundamentals

PROJECTS

ML Model Deployment on AWS

One of my most satisfying projects I built a binary classification model using scikit learn and then took it all the way through to a live REST accessible service on AWS EC2. I used S3 for storing and versioning the model artefacts, and made sure all IAM roles followed least privilege principles.

Cloud Based Data Processing Pipeline

I designed a full end to end ETL pipeline in Python that handles raw data ingestion, cleaning, and preprocessing before writing the results to S3. I also automated the execution with scheduled scripts, which eliminated a lot of repetitive manual work. This project gave me a clearer picture of how data engineering and ML workflows connect in a real cloud environment.

Static Website Hosting on AWS S3

Configured an S3 bucket for static web hosting, including custom error pages and properly scoped public access bucket policies. A straightforward project, but a good reminder that even simple deployments require careful attention to access settings.

WHAT I BRING TO A TEAM

I'm a practical problem solver who communicates clearly and doesn't shy away from asking questions when something isn't clear. I work well in team settings, adapt quickly to new tools and workflows, and manage my time well even when juggling multiple tasks. I believe good work comes from a mix of technical rigour and genuine curiosity and I try to bring both.

LANGUAGES

Tamil (Native) **English** (Professional) **Telugu** (Conversational)
